The implementation of the President's Executive Order denies every transgender person their basic human rights while needlessly places them at risk of assault and probably their very life. The fact that it was hastily implemented in a very poor manner without any warning or public comment has relegated every LGBTQIA+ individual to second class status.

Further the implementation of the Executive Order contradicts the very definitions outlined in the very same order.

I would normally provide my name in the personal information section. However I am fearful of retaliation and finding myself a political refugee of the very country I have been proud to have been a citizen of for my long life.
