I am concerned regarding the change of the term "gender" to "sex," requiring the field be populated with sex assigned at birth, and the lack of an intersex option.

I believe the change to sex assigned at birth will cause unwarranted hurt towards trans and intersex applicants. I also believe this change to be in violation of the *Zzyym v. Blinken* ruling by the US District Court for the District of Colorado.

I am also concerned that this change is in response to an Executive Order, rather than Judge Rulings or applicable Laws - especially regarding that Executive Orders are not legal documents. Responding directly to an Executive Order skips the checks and balances that keep our government functioning.
