The changes to the Passport Renewal Application form don't hold any benefit for people, other than working against Intersex people who scientifically cannot identify fully with being wholly Male or Female, as well as people who may identify with a gender identity different to their birth sex (including non-binary & trans persons). There is no issue to be solved by changing the wording from "gender" to "sex", only more harm by publicly denying people's gender identities. It has been proven through multiple gender studies that doing so will only harm these people, who are never going through these identities by choice, but rather by necessity. I have directly seen the pain that some of my trans and non-binary friends go through by living in a world that still goes against their whole existence. I believe it is everyone's right to live in a world that will not publicly shame them for just existing, not just non-binary & trans persons, but all people.
