Changing the passport information to call out sex instead of gender is going to lead to difficulties correctly identifying people. People who clearly present with a gender that does not match the sex listed on the passport will have more hassle as they travel. It may also be easier for someone to pretend to be someone they aren't with someone else's passport. Also, there are more than two biological sexes. It isn't just male and female. These changes are in violation of the enjoinder put on the state by the U.S. District Court for the District of Colorado in *ZZyym v. Blinken*.
