It is both deeply harmful and a waste of time/money/energy to force people to list their biological sex at birth instead of the gender they identify as and live as. Someone's gender doesn't harm anyone around them, but by forcing people to put their assigned sex, it makes spaces less safe for them, causes confusion, and is also just completely unnecessary. Please let's make our country safer for those that live in it, instead of sewing fear and hatred. I am a woman and you are not making the world safer for me by denying the rights of trans women. It just makes everything scarier and worse for all of us. It also violates the first amendment.
