Do not institute this change. It's not based on reality, legal, or moral.

The definition of sex exhibited by this document is incredibly superficial and not accurate to the reality of sex existing in more than a simple binary. It's lazy thinking that has been weaponized. It ignores proven science because truth is not the goal...it's hurting people like ones I know.

This is also not a legal action. Following through with this ignores laws and precedent and approving this would be only show that you, the person listening to this, have bowed to the pressures of those who would try to illegally codify malice.
