Both my wife and child would be unable to vote if these regulations are enforced. Their current names do not match their birth certificate- one due to La marriage name change and the other due to choosing a different given name. Why would that imposition be considered legal? We are protected as citizens in our right to vote. Clearly this law is prohibiting both passport data and voting rights. Keep transgender rights protected (as the current laws clearly state). Do not follow the illegal presidential executive order.

I refuse to be targeted by the AG or other organizations by revealing my name publicly. But I will be counted. And my family will be counted through my comments.
