E.O. 14168 is wholly unnecessary and updating the passport renewal process to use "sex" instead of "gender" is a waste of taxpayer money and time. The point of ID is to have a document that links a person's appearance to their information. This obsession with what genitalia people had as babies (because that's what sex assigned at birth is!) does not serve to help identify people in their current state. Trans people deserve to be treated with dignity, and their ID documents are most effective when representing who the person is in that moment. Passport ID photos have to be taken recently, it makes no sense to require people to use a potentially outdated marker of their sex assigned at birth, especially when it may not match how they look in the moment.
