It's extremely disheartening to see my government preparing to waste money in the name of knuckling under to cruel superstition, cynical grifting, and very poor understanding of science. The current system in place works fine. I am a woman and have been since birth, and I don't think it's the government's job to decide an individual person's gender. I thought we were against big government and the nanny state? The fact is that in your attempt to force trans people to change sex, you are trampling on the rights of intersex people, who do exist and were created the way they were by God, and while many parents of intersex infants do decide to have their children surgically altered to appear male or female, many choose to respect God's creation and raise a child who exists biologically between male and female. It is good and appropriate to have documentation which accurately reflects this.
