E.O. 14168 is not only unjust and discriminatory, it is biologically unsound. Trans people deserve dignity and identification documents that match their gender identity. Reducing identity to a binary "biological sex" is not grounded in science and will only endanger the welfare of people whose appearance may not match the sex they were assigned at birth. Identification documents are so essential to many parts of life-- voting, travel, etc-- that they should not be used as some pawn in a transphobic political agenda.
