The removal of X gender markers, stripping people of their identity, and denying medical/societal/cultural/scientific fact, is wrong, is immoral.

Trans people should be allowed to identify themselves as how they present. The should not be denied the the rights of expression, speech, and autonomy.

Removal of X gender markers, and stripping individuals of their rights to have Correct documentation is wrong. And any order to remove it should be called what it is, a fascist move to perpetuate a genocide.
