Americans deserve the right to update passports in a timely and accurate manner. Pausing or restricting passport updates will create problems for all Americans in terms of wait times, mistrust and confusion about agency policies, and will create a climate of fear around traveling. The attempt to restrict passport updates and changes is plainly discriminatory in its intent, but will harm many non-transgender people as well. Please ensure that name and gender marker corrections continue to be available to all for the sake of accuracy and efficiency.
