Policies which restrict updating relevant feild like name, gender, etc on federal documents will create chaos and confusion at locations of international travel. This will create problems for all Americans in terms of wait times, mistrust and confusion about agency policies, and will create a climate of fear around traveling. The attempt to restrict passport updates and changes is plainly discriminatory in its intent, but will harm many non-transgender people as well. Please ensure that name and gender marker corrections continue to be available to all. This only increases efficiency and prevents problems. It's a no-brainer.
