Transgender people exist, despite what an unconstitutional executive order claims. These proposed changes provide zero benefit to anyone, and they introduce harm to a substantial group of people. It is unscientific to claim that gender is strictly determined by sex chromosomes, as is taught in any introductory genetics course. It's anti-American to impose restraint on an individual's self-expression and identity when they are not harming others. And it's anti-Christian to oppress an already oppressed group of people even more than they already are.
