Removing gender information from passports and replacing it with "sex" which allows for only "M" or "F" is ridiculous, wrong, and unscientific. All people should have the right to have their legal documentation reflect their gender as they see fit, and an attempt to dodge this with "Sex" still doesn't work, as any self-respecting doctor would tell you that sex is often not that simple. How should intersex people fill this out? This is endangering people and putting them in the position to be forced to reveal intimate details about their sex organs and bodies to strangers and must be reconsidered.
