Hello,

I believe passport applications should allow for transgender, nonbinary and gender nonconforming individuals to continue to select the gender of their choice. In addition to discriminating against the LGBT community, these changes will damage people born intersex or with other natural, biological variance. Finally, as passports are meant to provide real identification, disallowing gender nonconforming individuals from selecting the gender they present as, makes a passport less effective as a means of identification. Please reconsider the changes being put forth by this executive order.

Thank you.
