This policy has severe negative impacts for a very small minority group, while not providing any benefit to the general public. This policy does not make the general public any safer, and as a trans woman I am feeling more and more targeted by this government. I have a Constitutional right to travel freely, and should have an expectation to do so freely. The sex I was born into has nothing to do with how safe others are flying with me, this just doesn't make any sense.
