E.O. 14168 is full of misogynistic animus for trans people for daring to defy patriarchy. The binary sex model is a falsehood with no basis in science. Trans people have always and will always exist because trans people are part of natural human biodiversity. Intersex and/or non-binary people who want the X marker deserve it. Forcing people to lie about their identity to get a legally-required document is evil and expressly forbidden by the law.
