The premise of these mandated revisions is false. For literally thousands of years we (humanity at large, across many cultures) have known that there are both scientifically and biologically more than only two genders, even if they may be rare. What point do these revisions serve? To make us less competent? Less equipped? To waste money? I thought this admin was all about saving money but it says here these revisions appear to be costing hundreds of millions of dollars? What are you guys doing? You're letting us down, creating needless panic, waste, acting on completely false information. And perhaps most importantly you have degraded BOTH domestic and foreign trust in our systems, from which we may not recover in my entire lifetime. PLEASE stop hurting your own citizens.
