This proposed law would unfairly discriminate against the 1.6 million transgender Americans within the country. Additionally, it would subject them to unfair discrimination, while traveling abroad, treating them as second class citizens. As a member of this minority group, I am urging our legislators to allow everyone freedom of movement, as well as equal international opportunities that an Accurate passport provides. Additionally, allowing US citizens to live freely as them selves. Promotes mental health, as stated by the American medical association, the American psychiatric association, and the center for disease control. Several of the administrations policies regarding transgender Americans have already been challenged in court and found to be unconstitutional. Please preserve American freedoms and ensure that no American it's subject to unfair discrimination because of inability to have documents that authentically reflect who they are.
