I'm writing to voice some of my concerns regarding the recent changes to passport form DS-11 brought on by recent executive orders from Donald Trump. I worry that these changes will have a drastic negative impact on certain individuals' (namely transgender and intersex citizens) ability to safely travel. I worry that these changes, which to my eyes seem will provide no great benefit to the larger American population whilst increasing tax burdens. I implore you to reconsider the effects of these changes and their necessity. Thank you greatly for your time.
