This is a ridiculous waste of time and money. As a passport holder I am in no way impacted or harmed by individuals using their preferred name and gender on their passport. I don't believe passports even need to have genders in the first place, considering this was not required in the past and again, passports are about security and citizenship. I am appalled by the actions taken by this administration in order to sanction and instigate discrimination against trans individuals and I am disgusted that government salaries- and our taxpayer dollars- are being used for such a purpose.
