I am a registered voter and an individual of transgender experience, and the new unlawful and unconstitutional policies set by the Trump administration to deny accurate gender markings on passports is targeted discrimination that puts my safety at risk when traveling. It is a basic right to have accurate identification papers. Being forced to display the incorrect gender marker on my passport will make travel extremely dangerous for me - especially as my physical appearance completely matches my gender identity, but I am currently forced to display my gender that was assigned to me at birth. When a border security agent sees my name and photo but a mismatched gender marker, I will be a target for discrimination and harassment. End this hateful policy, and listen to the recommendations of all professional medical associations that point to the importance of accurate identification papers for transgender individuals.
