I am a Republican. I voted for Trump. As a school teacher in California I have seen how our counselors encourage children dealing with depression to look at becoming trans as an eleven or twelve year old. I specially oppose hiding this gender change from parents. I disagree with this policy as it applies to children. I also support the idea of keeping biological male from competing in pure women's sports. But in reference to adults who chose trans gender as a freedom of choice, I totally support what they choose to pursue if it brings them happiness. I mean, we allow name change as adults. I believe it to be a right as deemed in the constitution to change your identity in name or sex if it involves that person's pursuit of happiness. I feel it an overstep of the Trump administration to prohibit any adult to have sex changes to their governmental IDs or passports.
