The proposed changes from the recent Executive Order "Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government," (requesting the biological sex at birth) are discriminatory and harmful to Americans who do not fit neatly into these rigid binary categories of gender.

There are biologically speaking, many chromosomal variations and genetic conditions that can make individuals intersex, infertile, or otherwise nonconforming to this strict male/female at birth requirement.

These changes to the Passport Application form are based on a factually incorrect scientific view, and furthermore are unjustly sowing fear of traveling for a very vulnerable segment of Americans.
