Im not the most educated in this field, but after reading into it and refering to personal experience, I believe this change will harm transgender US citizens, barring them their rights and freedoms simply because they are transgender and their assigned sex.

I lived in Central Asia for some time, where gay people are often scrutinized, if not subjected to physical violence by their peers. I shudder to think what they'd do to transgender people if they found out their gender doesnt align with the one they had at birth.

Not to mention, I believe this kind of action will go against and has been debated thoroughly in the Zzym v. Blinken case.

The file attached is a Class Action Complaint relevant to this topic that will make better points that I will be able to.
