What has been done in regards to the presidents anti transgender laws and now specifically in regards to the passport laws are unconstitutional and certainly against what the founding fathers intended, all people should be equal. This administration is not treating people with basic decency and respect and this has commonly led to civilizations being toppled over the course of human history, all it does is create enemies and hatred to spread. Discriminating against 1% of the population in this way protects no one and only harms that 1%. This law also can harm people traveling overseas thus causing issues internationally.
