I am a woman with XX chromosomes. I don't want this kind of protection, don't feel safer with it, and think it is discriminatory- shouldn't men need just as much protection? As a taxpayer it is wasteful to print new forms for no good reason. What about people who have an extra chromosome and are technically not male or female? I think it's a shame to make it really hard on the minority. As a Christian, Jesus says, what you do to the least of us is done to me. So you should be making rules that allow for the biodiversity that exists in nature and not using words to make what is false true. Be better. Do not enable something like the Stasi or third reich with your actions. Generations of Americans paid for your freedom. They are watching from heaven. Do not go gentle into that good night.
