Please do NOT pass/approve the proposed changes that will make it unsafe for US individuals to travel based on their appearance mismatching a passport gender marker/ sex designation.

A sex that doesn't match the passport holder's physical appearance /gender/ appearance, may cause them undue harm or identify them as transexual when travelling abroad.

Whatever arguments are made in the name of politics for the "x" marker, the requested sex by the applicant in their passport request form should be used by department of state of nothing else in the name of safety and security of US nationals abroad.
