I am commenting to register my opposition to this proposed change. We have an existing system that is working well and allows anyone to obtain their legal documentation that matches their gender. By forcing people to register a birth sex instead of their presenting gender you are opening them up to harassment, discrimination and physical danger. This change will be devastating for not only transgendered Americans, but also intersex people that have a genetic sex different from their gender. I encourage the department to revert this change to protect our fellow Americans and follow the established legal precedents in *Zzyym v. Blinken*.
