The suggestion that a regime can come in and attempt to strip Americans of their rights is despicable and wrong. We cannot allow some new officials with absolutely corrupt and hateful agendas disallow citizens from possessing appropriate gender markings for themselves. Sex is not gender and a persons gender assigned at birth factually is not the same as their actual gender. Whether or not certain actors in our government can wrap their heads around that fact should not be reflected in draconian orders that affect citizens' lives. These changes cannot be made. Not if a free America still exists.
