Culturally and historically, there have been more than two genders. To ignore this is to ignore knowledge and lived experiences. If we are to be a country that prides itself on being the "land of the free", who are we to choose who that freedom of gender expression goes to? Freedom of speech includes freedom of expression. Many people identify as a gender other than "male" or "female", and the lack of option will not deny the existence of these people, however it will not help them either. The lack of options to choose other than "male" and "female" is reductive, and will promote harm towards Americans who identify differently. This is unconstitutional. We must do better.
