The way these changes to updating a passport (specifically in relation to gender) is both cruel and will leave several hundred thousands if not millions of people unable to update their passport.

The EO in question is rooted in bigotry and an attempt to strip transgender people of their human rights by purposely misgendering them AND forcing their legal documents to do the same.

That's not even mentioning those stuck between stages, who have already changed some identification but will be unable to change their passport, thus becoming unable to leave the country.
