This is absolutely preposterous legislation. There is so much scientific and historical verification that transgender, intersex, and gender expansive people exist and have been documented since ancient times. We constitute less than 1% of the population and pose no threat to anyone. Furthermore, America is meant to be a melting pot of a country. Freedom for all. Across the world, third gender identities are recognized throughout many different cultures and religions, including many American indigenous cultures. How can we limit passports in a way that eliminate these individuals? It entirely denies our American rights to individual life, liberty, and the pursuit of happiness.
