I am writing to urge you to stand firmly in support of the rights and dignity of transgender Americans. At a time when their freedoms, healthcare, and very existence are being debated, I believe it is critical that our state leads with compassion, fairness, and respect for all individuals.

Transgender people, like everyone else, deserve the right to live authentically, access necessary medical care, and be free from discrimination in their workplaces, schools, and communities. Policies that target or restrict their rights not only cause deep harm but also go against the principles of equality that our country stands for.

I ask you to stand up against legislation that seeks to marginalize transgender individuals and instead advocate for policies that ensure their safety, inclusion, and equal protection under the law. Every person deserves to be treated with dignity and respect.
