The document should absolutely not collect applicant's assigned sex at birth, and should not change the word "gender" to "sex". These changes are discriminatory and hateful toward queer individuals, and fail to protect women in any meaningful sense, as queer, trans, and gender-non-conforming women will be harmed by the changes. Even cisgender women are not "protected" in any way by an additional item on their passport that could get them harassed if they don't look "feminine" enough. This is just going to result in random people being harassed and discriminated against because they do not conform to a fanatical ideal of binary sex categories that has never fully existed and never will exist.
