Hello, I am a constituent who opposes the proposed rule to restrict self-identifying gender on U.S. Passports. This policy is not inclusive of people born intersex, who may not fit neatly into Male or Female categories. Additionally, this proposed rule could expose transgender individuals to discrimination or harassment. Further, having gender on a passport does not enhance the ability to identify an individual. Honestly, it would be preferable to not include gender on passports at all, as it is unnecessary. But if it is included, it should be inclusive of transgender and intersex individuals.
