If you hadn't fired so many scientists, they'd tell you that when it comes to genetics, there are most definitely more than 2 genders. Trans people have the right to decide what gender they are, what their name is, and how their sex is designated on their passport. It's despicable that you're infringing upon that right, and that you're renewing their passports with their sex assigned at birth, instead of them having the dignity to decide for themselves.

Shame on you.
