I respectfully oppose the requirement for US citizens to have their passports changed to represent the gender assigned to them at birth. The idea of a gender binary is problematic at best, with the many variations of chromosomal configurations, as well as looking at genitalia at birth to estimate the gender represented. Sometimes it is obvious, sometimes not. This also denies our trans sisters and brothers the ability to choose how to represent themselves in society. This is UnAmerican. Please reject this unneeded change which represents repression as well as unneeded expense and government waste of resources and funding to implement.
