Hello, I would like to comment my opposition to the proposed changes to Application for US Passport. These changes are a waste of our government's time and taxpayer money and have no practical application that actual improves the role of a passport. Not only are the proposed changes administratively wasteful, they personally discriminate against my fellow Americans on the basis of sex. To force Americans to select a designation on their passport which is not true to their identity is a violation of the constitutional rights of all people endowed by their Creator including Life, Liberty and the pursuit of Happiness. Please do not further pursue these proposed changes. Thank you. Sincerely, US Citizen and Resident of Wisconsin
