Attacks on gender identity by the government show the ineptitude and aggression of our administration and a clear lack of desire to support the American people. Transgender people have existed for longer than this nation, to have a government that goes out of its way to spend time, effort, and tax payers dollars on these ceaseless and inexcusable violations of a minority population cannot be allowed. We need no targeted harassment of these people, the most bare of considerations are all that are required for our society and nation to move forwards in legitimate beneficial manners.
