I am writing to express my support for ensuring that the U.S. Passport Renewal Application process remains inclusive and accessible for all individuals, including transgender and nonbinary people. It is essential that all U.S. citizens have the ability to obtain accurate and affirming identification documents without unnecessary barriers.

I encourage the Department of State to continue recognizing gender markers beyond the binary "M" and "F" options, ensuring that "X" remains available for nonbinary individuals. Additionally, it is crucial that self-attestation of gender identity remains the standard, without requiring medical documentation or additional burdens that cisgender applicants do not face.

Access to accurate identification is fundamental for travel, employment, healthcare, and personal safety. I urge you to uphold policies that respect the dignity and rights of all individuals, regardless of gender identity.

Thank you for your time and consideration.

Sincerely,
Katherine Collins
