Please consider leaving the gender options on the passport be. Having people match to thier sex at birth creates a dangerous environment for them. Let's say the doctor makes a decision for an intersex baby and the hormones during growth do not match as that child grows. Now, everytime they travel, apply for a job, or even go to school we are outing them. Creating a dangerous place because some people believe they have the right to play God and judge others. God does not make mistakes. If people are happier and healthier they end up being productive members of society. It has been working the way we do passports so let's keep it the way it is. If there is someone who is dangerous to others, a passport change does not fix that problem. It only hurts all the good people. If you want to find people who are dangerous to women and children, then change the laws to actually fully prosecute those found guilty of doing those actions.
