The changes to the passport renewal form are unnecessary. a
Everything was working perfectly well before these changes. These changes do not address any legitimate issues as the gender anyone identifies as has no impact on others. Forcing these changes will cost the tax payers money to implement and defend a flawed ideology that opposes all scientific evidence, instead relying on outdated, simplistic ideas, further completely disregarding the millions of American citizens with an intersex condition. These changes are causing more confusion and concern for all USA citizens renewing their passports rather than easing the process. The policy should be reverted to the wording from before the executive order.
