I am writing in response to the recent Executive Order that declares that there are only two sexes, male and female and this should be reflected in passport identification. These Federal Passport Policy changes blatantly discriminatory against those who identify as Trans and/or nonbinary and violate our U.S. constitution that guarantees equal rights for all its citizens. With enactment of this policy we enter a slippery slope of discrimination and open the doors to enacting measures that deny rights based on age, color and/or disability. The trans/binary population makes up less than 1% of our U.S. population. Why target a harmless, peaceful population with undue hostility and create an environment of fear and reprisal? For what purpose? Please reconsider this ill-advised policy change. Thank you!
