I am opposed to the new forms that will not allow for a gender marker change or gender marker of X. Transgender and intersex people exist whether ignorant politicians understand it or like it or not. People should be able to have a gender marker that reflects their identity and presentation, including if that does not match their birth gender. Change the policies and forms back to how they have been the past few years. These new forms and policies only make transgender and intersex people less safe to travel
