Do not implement this change to passport applications! Requiring a binary definition of sex or gender sets a very dangerous precedent for the continued persecution of vulnerable populations. It lets the government exert unnecessary and frightening control in areas that have no impact on the safety and security of international travel. This change is one step towards the government's plan to bring everyone who isn't a white Christian "man" to heel. They have made that extremely clear and we need to stop these actions close to the source so they don't get bigger and bigger. We will all be left with no rights if that happens.
