Changing this application to have "sex at birth" is not going to be accurate for millions of people. Transgender people exist and intersex people do as well. Not allowing people to make the decision about their gender is violence toward the community. I should not have to have female on my passport when I have been living as a man for many many years and have had all of my documentation changed. If you make this change, you are complicit in the violence that is already happening to the transgender and intersex community.
