If this change is implemented, I will be forced to revert my gender marker back to an incorrect gender when I renew my passport. My documents have all been changed to Male, and my passport currently reflects that. I am perceived in my daily life as a man, people treat me as a man, and if my documentation does not reflect that, that would put me in a very dangerous position. Biology is broad, much more broad than just male and female, not everyone is even born M or F - intersex people exist. This will cause them to not be able to get a passport with an accurate gender marker. The point is cruelty, and this should not stand. You cannot erase transgender and intersex people. We do exist, and we will always exist. Having an incorrect gender marker on our passport just makes us more of a target, and if you make this change, you will be responsible for more violence against this community.
