This change is vicious and unconstitutional. It threatens everything that our country stands for, violating privacy and equal protection under the law. It compromises the rights of citizens to move freely. This proposed rule reflects a general disdain for or profound ignorance about the law. Generally, it is consistent with much of the buffoonery this administration is aggressively spewing. Know that this issue is not just impacting people at the margins it is impacting families like mine and we are ANGRY. Do not imagine for a moment that this will stand simply because you have picked on a relatively small group of people. They are not as marginalized as you think. The people you are targeting MATTER and they are loved. This proposed rule illustrates everything that is wrong with the current administration and will help cement our reputation as a failed state. Rules that attack anyone who identifies as trans and nonbinary in actual fact give ALL Americans a new identity: potential refugees fleeing an oppressive country. Keep at it and soon the only people left here will be the uneducated bigots you have cultivated as your base of support. You think your measure of success is putting white heterosexual men on 'top' and minimizing everyone else. That is one measure-- the other measure you don't realize is that soon no decent, intelligent person will ever choose to visit or live in the United States anymore. The only people left will be the folks who cannot afford to leave. Good luck with that.
